

Main Process Plant Building (MPPB) Controlled Deconstruction Update

Week of September 11, 2023

Upper CPC East Wall

The Department of Energy's West Valley Demonstration Project (WVDP) continues the deconstruction of the Main Plant Process Building. To date, workers have removed the Chemical Process Cell west wall, racks, and ceiling, Analytical Decontamination Aisle, Component Test Stand, Inductively Coupled Plasma Lab, and 3M3 Shield Door. They have started work on the Control Room and Sample Storage Cell.
