SUBJECT: State Pollutant Discharge Elimination System (SPDES) Discharge Monitoring Report (DMR)
for the Period May 1 through May 31, 2016, SPDES Permit No. NY-0000973, West Valley
Demonstration Project (WVDP)

Dear Mr. Haugh:

The West Valley Demonstration Project's SPDES DMR for the reporting period May 1 through May 31, 2016, including the Net Iron concentration sheet, is attached.

Please note there was no discharge at outfall 001, 007, 116, Sum-N, or internal outfall 01B during this period.

Please also note that as of September 15, 2014 the site transitioned from withdrawing water from the reservoirs to supply the site's water needs (potable and industrial) to the use of two recently installed groundwater wells. This transition has eliminated several functions within the utility room, (i.e., sand filter backwashes and clarifier blowdowns) thereby significantly reducing, or eliminating entirely the discharge from outfall 007.

The change to groundwater wells also eliminated the need to collect raw water samples on a weekly basis for the analysis of iron and will alter the iron discharge concentration equation as the mass of raw water entering the system will no longer be calculated.

As required in Title 6 of the New York Codes, Rules, and Regulations (6NYCRR) Part 750-2.5(e)(3), the New York Environmental Laboratory Accreditation Program (NYELAP) identification numbers for the laboratories performing are normally required, however, the WVDP did not have any sample analysis completed for this DMR.

If you have any questions, please contact Moira Maloney of the U.S. Department of Energy West Valley Demonstration Project (DOE-WVDP) at (716) 942-4255 or William Kean of my staff at (716) 942-4865.

Sincerely,

for JDR
